CAREER OBJECTIVE

A Computer Science Engineer with capabilities in Data Science, Machine Learning and Deep Learning, Python programming, SQL, and Web Development. Skilled in applying analytical thinking to real-world problems through data-driven approaches, building predictive models, and developing responsive full-stack web applications. An aspiring AI/ML Engineer who seeks a challenging environment to demonstrate these capabilities, contribute meaningfully to impactful projects, and grow alongside emerging technologies in artificial intelligence and intelligent systems.

EDUCATION

Visvesvaraya Technological University (VTU)

Bachelor of Engineering in Computer Science & Engineering(AI&ML)

2022 – 2026 | CGPA: 9.2

Sujala PU College

XII – PCMB

July 2022 | Percentage: 73%

Sri Adichunchanagiri High School

SSLC, Karnataka State Board

May 2020 | Percentage: 87%

TECHNICAL SKILLS

Data Science: Exploratory Data Analysis (EDA), Data Preprocessing, Visualization, Power BI, Pandas, NumPy.

Machine Learning: Supervised & Unsupervised Learning, Regression, Classification, Clustering, Model Evaluation, Scikit-learn.

AI / ML Applications: Predictive Modelling, Image & Video Classification, Deepfake Detection, Healthcare Analytics.

Programming Languages: Python, Java, JavaScript.

SQL & NoSQL Databases: MySQL, MongoDB.

Web Development: HTML, CSS, React.js, Node.js, Express.js, PHP, REST Responsive UI Design.

UI / UX: Figma, User-Interface Design, Wireframing, Front-End Prototyping.

Tools & IDEs: VS Code, PyCharm, Jupyter Notebook, Google Colab, Git & GitHub, Excel.

Operating Systems: Linux (Ubuntu), Windows; Shell commands, file system navigation, package management.

PROJECTS

Deepfake Detector Using Machine Learning

Exploratory Data Analysis Project [Python | ML Algorithms]

Project GitHub link: Deepfake Detector Using Machine Learning

- This study presents a deepfake detection approach using a ResNeXt CNN for spatial feature extraction and an LSTM for temporal analysis. Trained on datasets such as FaceForensics++, DFDC, and Celeb-DF, the model accurately classifies real and fake videos and demonstrates strong performance in real-world scenarios.

Advanced EDA in Cricket Insights into Player Team Performance Trends Using Power BI

Project [Python | Pandas | Power BI]

Project GitHub link: [Advanced EDA in Cricket Insights into Player Team Performance Trends Using Power BI](#)

- This project Performed Exploratory Data Analysis (EDA) on T20 World Cup cricket data using Python, Pandas, and Power BI. Cleaned and transformed the dataset, analyzed player performance metrics, and developed interactive dashboards to identify the Best Playing XI.

JNCASR Research Fellowship Project

Real-Time UI/UX Design & Front-End Development for Central Government Research Institution

Project link: Summer Research Fellowship Programme (SRFP) – JNCASR

- Worked on a real-time JNCASR research project, designing and developing the landing page with user-centered UI & UX and responsive front-end development, improving navigation, visual hierarchy, and overall user experience.

INTERNSHIP

Aitch Nu Global Technologies Pvt. Ltd.

MERN Stack Developer Intern

September 2025 – January 2026

- Gained hands-on experience in full-stack development using MongoDB, Express.js, React.js, and Node.js. Strengthened understanding of API integration, component development, and responsive UI design. Improved skills in debugging, teamwork, and real-time project development, building a foundation in modern application development.

NUCOT Technologies Pvt. Ltd.

Data Science with Python Trainee

April 2026 – June 2026

- Completed hands-on training in Data Science with Python, gaining practical experience in Python programming, data preprocessing, exploratory data analysis (EDA), data visualization, and machine learning using libraries such as NumPy, Pandas, Matplotlib, and Scikit-learn. Developed interactive Power BI dashboards and applied data analytics techniques to solve real-world datasets, strengthening analytical and problem-solving skills.
